

REPORT

MANAVTA CLUB ACTIVITIES

2nd- 4th August -

The member's of club rescued a dog who was severely wounded by applying veterinary (Topicure) medicine on the wounds which was effective in its treatment and the dog was fully cured within 3 days.

21st- 23rd August -

The member's applied tick spray to all the dogs present in the campus in order to remove ticks.

26th September -

In order to communicate ourselves to all the students the members, we stuck many posters in the Institute's campus.

Feeding Work Distribution –

Club has created a structure for feeding the dogs by making 4 groups of 4-5 students in each group who are assigned particular dogs in different areas of the campus.

Upcoming Event

FUNDING FOR VACCINATION -

For a greater benefit of the dogs and also the students and staff the club has decided to vaccinate all the dogs of the institute for the same, we organised a meeting to discuss about the mission and assigned several duties such as, communication, social media for funding and the works.
